

Public information meetings

Keeping the community involved and informed

Construction projects—like the US 41 Project in northeast Wisconsin—bring many unique challenges to a community. That's why keeping the public informed about the US 41 Project is important to WisDOT. Over the course of construction, WisDOT will host public information meetings to address questions and concerns in Brown and Winnebago counties. Check this section of our website to find a meeting near you. Too busy to attend? No problem. Meeting exhibits, handouts, presentations and other resources can be found here.
